

Development process

- In any long-term project it is advisable to create a step-by-step list that you will need to follow in order to complete your product or outcome.
- This can act as a timeline for you to follow to complete your personal project.
- This is a fluid timeline and can be changed to suit your individual requirements.
- Space has been provided for 10 steps in the process but you may require fewer or more depending on your individual product or outcome.
